# LEADING A RADICAL CHANGE IN CORPORATE GIFTING SUSTAINABLY

OUR AREAS OF IMPACT

# CHENCE ZERO

THE CARBON NEUTRAL COLLECTION

Using recycled materials to reduce carbon footprint (calculated by EcoAct - France).

Funding renewable energy projects to offset balance CO<sub>2</sub> footprint via ClimatePartner.

#### **SERIOUS SUSTAINABILITY**

Using certified recycled materials with full supply chain traceability.

Contributing 3% to Water.org to provide 24,000 people with lifetime access to clean water & sanitation.

# OUR SUSTAINABILITY IMPACT HIGHLIGHTS

ACCUMULATED IMPACT DATA UNTIL MARCH 31, 2024

# 1,522,110 PLASTIC BOTTLES REPURPOSED

Instead of disposing plastic bottle waste, we collect and reuse it to create new, stylish, recycled products such as bags and polos which are part of our CHANGE Collection.

Since we launched our CHANGE Collection, we have saved 716 million litres of water from use in irrigation in convention cotton.

# ENABLING CHANGE AT LARGE ORGANIZATIONS

Enabling 100s of our clients with sustainability efforts and stakeholder education on genuine supply chain sustainability.

# 24,000 PEOPLE PROVIDED WITH LIFETIME ACCESS TO SAFE WATER

Through our partnership with Water.org, we donate 3% of each sale from our CHANGE Collection to help water-stressed communities get lifetime access to safe water & sanitation.

# TOTAL 236,000 KGS OF CO2 EMISSIONS REDUCED THROUGH SMART CLIMATE FINANCING

We have offset a total of 236,000 kg of CO2 from our CHANGE Zero Collection by supporting renewable energy projects financed by ClimatePartner (purchases from 1/4/24 to 30/9/2024).

# 38,501,000 PLASTIC BOTTLES COLLECTED

Through a collaborative effort with our stakeholders and partners, we have prevented 38.5 million plastic bottles or roughly around 438,911 kgs of plastic from entering the ocean.

# INTRODUCING OUR CARBON FOOTPRINT CALCULATOR

Environmental action from public and private sectors will gather momentum in 2025 and beyond. Many institutions have set ambitious NET ZERO targets in the near future. The first step to NET ZERO is measuring your carbon footprint, which is difficult in a world of complex supply chains and unreliable data / claims.

In partnership with **ecoact** - a world leading French environmental consultancy, we have developed an industry-first carbon footprint calculator (named On Track) to report the impact of most of our products reliably. By assessing our entire supply chain—from raw materials to end-of-life—we provide reliable carbon footprint data in kgs of CO2 equivalent terms. Our tool is ISO-14067 certified by Bureau Veritas, ensuring accuracy and credibility in our data.

### How It Works | ecoact

Using Life Cycle Assessment (LCA) methodology to assess the full environmental impact of a product going from extraction, transformation, production, packing, shipping, and use to end of life.

This award reduced **30%** carbon emission compared to a traditional award.

# MADE FROM U/ASTE, TO END U/ASTE.

# We believe that Circular Design can save the Future is Circular. the world.

Circular Design is workable solution at a time when the world desperately needs solutions. We create products made with recycled materials, designed to last and fully recyclable. We work to a simple yet immensely challenging rule of 100-10-100. Any product created can only be justified if it's trying to or helping to achieve 100% recycled content, designed for at least 10 years use and then 100% recyclable at the end of it's useful life.

1. Make from recycled materials.

2. Design to last.

3. Ensure 100% recyclable.

# THE END OF GREENWASHING

#### TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

We believe true sustainability can only be achieved when there is transparency and traceability. Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

# IMPACT THE POWER OF TRACEABILITY

AWARE 
All recycled content claims are validated with AWARE<sup>TM</sup> which unites a physical tracer with public blockchain technology for trusted traceability.

# CHANGE. SERIOUS SUSTAINABILITY

# DESIGN & SUSTAINABILITY

CHANGE Collection is all about design, sustainability & giving back. All recycled fabrics, plastics, and materials used in this collection are 100% certified by the Global Recycled Standard (GRS) and Recycled Claim Standard (RCS).

From each of these collections, 2-3% of sales are donated to water.org to help provide water-stressed communities with lifetime access to safe water & sanitation.

#### **BIO BOTTLES MADE IN** THE NETHERLANDS

Tack Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tack is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor(UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56-4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.

### CUSTOMISED APPAREL

### Typical measurements:-

	М	L	XL	М	L	XL
Α	28	29	30	29	30	31

С	8	8.5	9	8.5	9	9.5

These measurements are for guidelines only. The actual measurements may vary slightly between garments as knit garments have internationally accepted higher tolerance values

### GSM or GMS?

Most manufacturers confuse clients with this. GSM: Grammes per sq. meter is the wt. of the fabric in a square of 1 meter x 1 meter it remains the same in all sizes. Hence the correct way to describe GMS: is the wt. in grammes per piece of the Tee/Polo And will always vary with each size. Thus, completely misleading. We ALWAYS specify the GSM. So you are rest assured of what we offer

### Heavier the better?

Not necessarily. The quality of yarn will decide the quality and Price. Super combed, combed, semi combed and carded: this is the quality of YARN in descending order. We specify the yarn. So you are rest assured of what we offer.

## BIO BOTTLES MADE IN THE NETHERLANDS

Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

# CARDHOLDER CUM WALLET

PRESENTING A WALLET THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

### SANTHOME SECURITY FOR YOU

Scan Below **QR** code to watch product video

#### How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

#### **Using the Cardprotector**

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

#### PRESENTING A WALLET

#### THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

#### How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

#### **Using the Cardprotector**

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

# Sustainability and Transparency Organization and Certification

# Global Recycle Standard (GRS)

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that tracks and verifies a product's recycled content, chain of custody, social and environmental impact and chemical restrictions.

The objective of the GRS is to define requirements to ensure accurate recycled content claims

# Recycled Claim Standard (RCS)

The Recycled Claim Standard (RCS) is used as a chain of custody standard to track recycled raw materials through the supply chain.

The GRS/RCS logo ensures the materials used in the product are genuinely recycled.

# Forest Stewardship Council (FSC)

The Forest Stewardship Council (FSC) label is the world's most trusted mark for sustainable forestry.

FSC's pioneering certification system, which now covers more than 200 million hectares of forest, enables businesses and consumers to choose wood, paper and other forest products made with materials that support responsible forestry.

In partnership with **ecoact** - a world leading French environmental consultancy, we have developed an industry-first carbon footprint calculator (named On Track) to report the impact of most of our products reliably. By assessing our entire supply chain—from raw materials to end-of-life—we provide reliable carbon footprint data in kgs of CO2 equivalent terms.
